WORK EXPERIENCE (3)

Jul 2023 - Current

QA Automation Engineer at RevealSecurity

https://www.reveal.security

My role is the QA Automation Engineer and included all process of Software Quality Assurance. The product is SaaS and On-Prem applications

- Developed e2e Test suite based on Playwright/JavaScript for React App
- Supported API Test suite on JavaScript/Mocha/Chai
- Dealt with Pandas, Parquet, PostgreSQL (PL/pgSQL), S3 Buckets
- Analyzed CloudWatch log groups using insights queries on AWS
- Built GitHub Actions for CI/CD
- Documented test cases in TestRail

Dec 2021 - Aug 2022

QA Automation Engineer at BigID

https://bigid.com

I joined as a QA Automation Engineer to Connectors and worked with Front-End part. I've worked at startup so I am use to wearing many hats. I worked according to Agile/Scrum technique with daily syncs. Our team followed to two-weeks sprints.

- Developed and fixed e2e tests on Cypress
- Wrote STP, STD and documentation in Confluence
- I did bugfixing and developed new features on React/TypeScript
- Developed tool for rebasing process in Git (daily routine) on Bash
- Worked with Jenkins/Blue Ocean/Allure

Jul 2019 - Dec 2021

Test Engineer at Silicom Ltd.

https://www.silicom-usa.com
This role is very multifaceted and involves interaction with hardware and software.

- Worked with a lot of bash scripts and writing new and rewriting old ones
- Analyzed new hardware stuff and preparing to implement QA testing
- Created ATPs and manuals
- Interacted with R&D engineers and worked along side with them
- Experience in writing scripts and test documents STD, STP, STR
