MblCJluTeJlb iramzesi Roman.Pinchuk roman-pinchuk

I am a QA professional with over 3 years of experience in ensuring the quality of hardware and software products. With expertise in hardware testing methodologies and industry-standard tools, I can identify defects and debug complex issues to deliver high-quality products on time. I am a strong collaborator and possess excellent communication skills to effectively work with cross-functional teams.

SKILLS

Databases

Master

MongoDB · Google Firebase · PostgreSQL · MySQL

CI/CD

Fluent

YAML · GitLab CI/CD · GitHub Actions · Jenkins

Additional Tools

Master

Git · Jira · Confluence · graylog · Docker · Postman · Playwright

WORK EXPERIENCE (3)

Dec 2021 - Aug 2022

QA Engineer at BigID

I joined as a QA Engineer to Connectors team but continued as a Software Engineer. I've worked at startup so I am use to wearing many hats. I worked according to Agile/Scrum technique with daily syncs. Our team followed to two-weeks sprints.

- Developed tool for rebasing process (daily routine) on Bash
- Review and light fixing of connectors / Java (Maven)
- I did bugfixing and developed new features on React / TypeScript
- Developed and fixed e2e tests on Cypress
- Worked with Jenkins / Blue Ocean / Allure

Jul 2019 - Dec 2021

Test Engineer at Silicom Ltd.

As a QA Engineer at Silicom, a hardware company specializing in connectivity solutions, I have gained valuable experience in ensuring the quality of our products. My deep understanding of hardware testing methodologies, including design verification, functional testing, and reliability testing, has allowed me to design and execute test plans that identify defects and ensure the timely delivery of high-quality products.

- Worked with a lot of bash scripts and writing new and rewriting old ones
- Analyzed new hardware stuff and preparing to implement QA testing
- Interacted with R&D engineers and worked along side with them
- Experience in writing scripts and test documents STD, STP, STR, ATPs and manuals
- Training and transaction of manufacture to subcontractors

Jan 2017 - Aug 2018

Systems Analyst at Compulsory Medical Insurance Fund of Russia

I was involved in supporting and developing the existing information system for planned hospitalization in St. Petersburg. In the project I used PostgreSQL, jQuery, Camunda BPMN. Initially I came to the position of System Analyst, but soon I moved to the development department as I saw a lot of defects.

- Analyzed the existing system of the hospitalization program
- Administrated PostgreSQL Databases and maintained server which one based on Debian OS
- Ensured the performance and fault tolerance of the information system with more than 7,500 users
- Implemented of new business processes
- Communicated with developers and wrote specifications
- Embedded JasperReports for Camunda BPMN

EDUCATION (2)

2013 - 2017

BSc Applied Computer Science at Russian State Hydrometeorological University, RU
Grade: 98.2

2007 - 2011

Technician Software of Computing and Automation Systems at Technical College of Management and Commerce, RU
Grade: 96

AWARDS

2020

Top 5 at Hackorona supported by Microsoft
KEEPSTANCE is a project from the hackathon 'hackorona', which was supported by Microsoft and the in.dev community. The event was attended by 1400+ participants and about 60 teams. We made it in 5 days to the top 5. <a target='_blank' href='https://www.meetup.com/in-dev/events/269544274/'>Hackorona Event Page</a>
